Inpharmatica
= Drug Discovery

hit finding
lead optimization
hit to lead

BioFocus DPI has added the premier predictive drug discovery technologies of Inpharmatica to its arsenal of capabilities. We now offer a complete array of drug discovery products and services - all the way from target discovery and assay development to medicinal chemistry and molecular informatics. This unique combination sets a new benchmark for drug discovery services. No wonder most pharma and biotech companies have already engaged in successful collaborations with BioFocus DPI.

The world's leading pre-clinical discovery services company
